# SOLAR LAW

Present and Future,  
with Proposed Forms  
by Sandy F. Kraemer

Here is the first comprehensive coverage of existing solar legislation which, additionally, comes to grips with solutions to potential questions of law arising out of accelerated utilization of solar energy.

None too soon does Kraemer's SOLAR LAW become available to the many diverse groups and individuals who will welcome its legal and practical analysis of the issues of solar energy as an alternative source for heating and cooling by homeowners and industries.

A \$1.3 billion market for solar components by the first half of the 1980's is now being predicted by industry leaders. The legal implications of this expansion should not be underestimated.

Kraemer tackles his complex subject with authority and instructs the reader with commendable clarity.

"What are the legal public and private alternatives to assuring access to direct sunlight?"

"How does the astronomical sun-earth relationship affect solar laws?"

"What is the interrelationship of public utility rates to solar energy?"

These are some of the questions that SOLAR LAW answers as it moves with orderly style from one aspect of its subject to the next.

As absorbing as it is informative, Kraemer's SOLAR LAW takes the reader through an enlightening tour of the frequently murky areas of the energy shortage on its way to introducing solar systems. Solar easements, covenants, zoning, subdivision regulations, public and private nuisance issues are all examined individually with model examples followed by legal analysis and recommended forms.

SOLAR LAW will interest and be-

come a mandatory addition to the library of people in the fields of law, land planning, engineering, architecture, solar energy fabrication and installation, consumer organizations, environmentalists, land developers, home builders, government, and utility companies. And property owners in general.

**\$1.3  
BILLION**

**\$35.00**  
each

#### About the Author

Sandy F. Kraemer is a Colorado Springs (Colorado) lawyer whose combined background in engineering and law has been channeled in support of new legal concepts to encourage solar energy development.

Author of many articles on solar law, he has sponsored relative state legislation and local ordinances. He is sought as a legal counselor by solar industries, is a nationally recognized speaker on energy policy and solar law. He serves as a consultant to the Phoenix Solar Project which is supported by the National Science Foundation.

Kraemer received his B.S. from Stanford University and J.D. from the University of Colorado for which he presently serves as a member of the Board of Regents.
